[Create Email for Subs](#)

GC-FTP allows you to create projects quickly and easily. All you need is an internet connection.

Project details including the username and password for the specific projects are created and controlled by you.

Default email addresses and disclaimers defined by you limit the amount of detail you have to fill out for each project. The option to override these two items is available for every project.

You can email this project to your subs via this screen.

[Details](#) [File Explorer](#) [Bulk Upload](#)

Put all the files you wish to upload in a single Zip file and then upload that file using this form. Be sure to maintain your folder structure in the zip file and the files will be unzipped in the appropriate folder structure on your site. Any files with the same name in the same folder as the zip file will be overwritten.

The max zip file size is 1.9 GB you can upload. The maximum amount of upload time is 10 hours. Please make sure your bulk upload zip file is smaller than 1.9 GB and will upload in less than 10 hours. Your upload time is limited by your Internet connection.

Bulk upload allows you to browse to your computer and upload a zipped file containing all of your project details.

Details | **File Explorer** | Bulk Upload

The screenshot shows a web-based File Explorer interface. On the left, a tree view shows a folder structure: Vista Corporation > Addendums. The main pane shows a table with the following content:

Filename	Size
testfile1.doc	50688

An 'Upload' dialog box is open in the foreground, featuring three 'Select' buttons for file selection, an 'Overwrite if file exists?' checkbox, and a list of allowed file extensions: *.jpg, *.pdf, *.txt, *.doc, *.xls, *.xlsx, *.docx, *.ppt, *.pptx, *.tif, *.rtf. An 'Upload' button is at the bottom of the dialog.

File Explorer organizes your files and allows you to upload individual documents at a time. This view is great for modifications and addendums to projects. One quick file upload and the project is updated for all subs.

Subcontractors get to your project by signing in with the username and password you created for that specific project. They can review all files for that project and select the ones they wish to download.

Subs can also email the estimator for this project if they have a question

Files listed as "required" by you are automatically downloaded for your subs.

Your subs must agree to your disclaimer and mark the checkbox before any files are downloaded to their computer. This ensures you have received compliance from them.
